

Executive General Management Program for Technical Professionals(IITB)

ABOUT THE PROGRAM

As Indian Industry undergoes a gradual metamorphosis, technical personnel require not only new levels of technical knowledge and skills, but also higher levels of managerial skills. In general, it is observed that technical personnel are good at managing the technical aspects of the job but are not adept at managing the various other elements involved in it. Only continuous training and development in the latest management tools and techniques can enable them to become effective managers in today

The program is relevant for fast-track managers, who have recently taken charge of a general management role, in terms of equipping them with the ability to cope with responsibilities and issues at that level through formal management education.

Pedagogy

The pedagogy will be highly interactive. It will leverage the use of technology. It will consist of a judicious blend of lectures, real life case studies, quizzes and assignments. The sessions will be delivered on HughesNet Global Education interactive learning platform.

Evaluation

Participants are evaluated on the basis of examinations. The respective course instructor will evaluate each course on a continuous basis. Candidates successfully completing the program will get a completion certificate from IIT Bombay.

Schedule & Duration

- The programme would be of one year duration.
- The classes will be offered on Sunday 12.15 pm – 3.15 pm
